
COURSE SYLLABUS

**Learn How To Travel Now
By Working Along The Way!**

Congratulations! You have officially taken the first steps towards launching your Workamping Adventure! Something that takes an adventurous spirit and an open mind. Workamping really is an awesome opportunity! It allows people from all backgrounds to hit the road without a pension plan, without a huge savings or trust fund, and without a home based business.

What Is Included In This Course:

7 days of education and information delivered right to your inbox! This e-course is designed as a series of PDF files containing the course information for that day. Simply download the PDF, complete any homework assigned for the day, then mull it all over until the next day, when the new lesson arrives. You can complete your course in 7 days, or just go through it at your leisure and take as much time as you need!

Day 1: Understanding The Workamping Lifestyle.

Before you can do this, you have to know what it is! Start with the basics and everything else will fall into place. Learn what you're signing up for and what the community is all about.

Day 2: Choosing An RV: Your New Home On The Road.

An RV is a very important part of the Workamping lifestyle! You will need one for almost all employer offered jobs, so you might as well pick one that's right for you! After-all, this will be your new home on the road.

Day 3: Creating The Working Vacation Mindset

You're not on vacation... well not entirely! Changing your mindset to what I like to call a 'working vacation' is imperative. If you set off on your adventure in vacation mode- you might experience burn out while trying to live life like a tourist rather than one of the locals. Find out how to make the shift!

Day 4: Planning For One Season At Time.

First things first! You can't attack the whole year at one time. Learn how to plan each season individually, so you'll never have overlap! This will ensure you don't have to make the big decision to leave one job early or arrive late to another... costing you an employer reference and possibly a completion bonus.

Day 5: Finding Jobs In Places You Want To Travel.

Finding the jobs is a huge task! To be successful, you need to know the process for making sure all your hard work and effort pays off in the end. Let me walk you through my personal 9 step process of getting Workamping jobs!

Day 6: 10 Employers You Need To Know!

There are always a few Vets who need to be known! Workamping is no different. These 10 programs made my list of Top 10 Workamping employers for one reason or another. Get to know the key players!

Day 7: 101 Workamper Employers

Sometimes you don't want to do all the work, I get that. It's a lot! So, I'm starting you off with 101 employers who hire Workampers during the year. You still have to do some research for the details and how to apply!
